

## ***Construction Works Notification***

### ***HOB-WRD Transpower 220kV Sheath Repairs – Westhaven Drive***

Transpower is the State-Owned Enterprise that owns, maintains, and operates New Zealand's high-voltage national electricity transmission grid.

Transpower Contractors, Northpower and WMConstruction will be carrying out repairs on the 220kV underground cables that run along Westhaven Drive between Hobson Street and Wairau Road.

**These works are programmed to be delivered between the 13<sup>th</sup> of July and the 16<sup>th</sup> of August 2026.**

**The works will be located between the car park entrance adjacent to Pier R and the car park entrance adjacent to Pier Z, and Westhaven Drive will be closed to vehicular traffic between those points for the duration of the works.**

Access to all buildings and businesses will remain available at all times, although a detour may be required.

During the works we will have temporary traffic and pedestrian management in place. Please follow detours and the directions of our traffic management staff on site and use alternative routes if possible.

Pedestrian and Cyclist access will be open, however, this will be via the shared paths as the full road carriageway will be closed.

These works are being completed on high voltage transmission cables and so will not have any impact on the local power supply.

We apologise in advance for any inconvenience and thank you for your patience while we carry out this essential construction work.
